Fadwa Abdullah Barnawi

Riyadh, Saudi Arabia | +966 545840997 | b.fadwaabdullah@gmail.com | linkedin.com

PROFESSIONAL SUMMARY

Ambitious Information Systems (IS) graduate with a foundation in data analysis, SQL, database management, and data visualization using Power BI and Excel. Experienced in academic projects involving machine learning, data-driven performance evaluation, and relational database design. Interested in transforming data into meaningful insights that support business decisions and improve product performance. Eager to contribute analytical, technical, and problem-solving skills while continuing to develop expertise in business intelligence and data analytics.

EDUCATION

Bachelor of Science in Information Systems | Taibah University
Graduation Year: 2026

TECHNICAL & SOFT SKILLS

- **Technical Skills:** Data Analysis, Database Management (SQL, MySQL), Systems Analysis & Design, Machine Learning Concepts, Data Visualization (Power BI, DAX, Power Query, Excel).
- **Programming Languages:** Python (Pandas, NumPy), Java, JavaScript, HTML/CSS, Flutter.
- **Soft Skills:** Teamwork & Collaboration, Problem-Solving, Time Management, Effective Communication, Critical Thinking, Adaptability.

PROJECTS

HR Attrition Dashboard | *Data Analysis & Visualization Project*

- Built an interactive Power BI dashboard analyzing employee attrition in the IBM HR Analytics dataset, showing where attrition is concentrated by department, age group, and marital status.
- Found an overall attrition rate of **16.1%**, with Sales the highest at **20.6%**; employees aged 18-29 make up 22% of staff but about **38%** of leavers.
- Built with Power Query, DAX, and a custom theme, and concluded with actionable recommendations for HR.

MUNIR: AI-Driven Quran Recitation & Tajweed Support System | *Graduation Project*

- Developed an AI-driven application designed to enhance Quran recitation accuracy and Tajweed rule application through speech processing technologies.
- Worked on audio preprocessing and model evaluation to improve recognition performance and identify recitation errors.
- Built and tested a machine learning model trained on audio datasets from expert reciters to detect pronunciation and articulation errors in real-time.
- Designed a performance analytics dashboard within the system to track learners' progress, generating detailed statistical reports on accuracy levels and specific areas of difficulty.

Breast Cancer Diagnosis System | *Data Mining & Machine Learning Project*

- Developed and optimized a machine learning classification model utilizing Python, achieving a **97% accuracy rate** in classifying benign and malignant tumors.

Beauty Petals | *E-Commerce Web Application*

- Developed a full-stack e-commerce platform using HTML, CSS, JavaScript, and Node.js.
- Designed and implemented a robust relational database schema to manage inventory, customer data, and order processing efficiently.

Quick: Student Transportation & Mini Market System | *Systems Analysis Project*

- Applied advanced systems analysis and database design principles to create multi-user workflows and process automation, significantly reducing manual errors.

The Max Profit | *Stock Exchange Platform*

- Built a web-based financial platform for stock trading and portfolio tracking using Java, integrating data visualization tools to support informed financial decisions.

COURSES & CERTIFICATIONS

- **Google Data Analytics Professional Certificate Courses** | Google (Coursera) | *2023*
  (Includes: Prepare Data for Exploration, Process Data from Dirty to Clean, Analyze Data to Answer Questions)
- **Relational Databases - MySQL** | Coursera | *2023*
- **Introduction to Data Analytics** | IBM (Coursera) | *2024*
- **Excel Basics for Data Analysis** | IBM (Coursera) | *2024*
- **Python for Data Science, AI & Development** | IBM (Coursera) | *2024*

LANGUAGES

- **Arabic**
- **English**
